Cabramatta Loop Project

ARTC

CABRAMATTA LOOP PROJECT

In May 2018, the Federal Government announced its commitment to the Cabramatta Loop and Botany Rail Duplication Projects.

Transporting freight by rail to Port Botany is a key priority in order to support the economic growth of Sydney. The construction of additional railway infrastructure between Cabramatta and Warwick Farm stations will enable greater efficiencies in the rail freight system, help meet future freight demand and support the NSW Government's targets to increase the use of rail transportation.

The Cabramatta Loop Project includes the following key features:

- Construction of new track approximately 1.3km long. This new track will enable carriages to simultaneously pass each other through the 'loop track' from both directions. This track will run parallel to and form part of the Southern Sydney Freight Line.
- Two new rail bridges will be constructed over Sussex Street and Cabramatta Creek/Railway Parade.
- The road alignment of Broomfield Street in Cabramatta will need to be adjusted to accommodate the new loop track.

The Cabramatta Loop Project is a State significant infrastructure project and is therefore subject to State Government planning approval.

The Cabramatta Loop Project is a key Australian Rail Track Corporation (ARTC) initiative to support the Sydney Metropolitan Freight Strategy 2015–2024 and NSW Freight and Ports Plan 2018–2023. Together, with the Botany Rail Duplication Project, the Cabramatta Loop will provide the capacity to meet future growth in the transportation of containerised freight between Port Botany and metropolitan freight intermodal terminals

COMMUNITY AND STAKEHOLDER ENGAGEMENT

This *Engagement Plan* outlines the engagement proposed during the environmental assessment and reference design phases for the Cabramatta Loop project (the Project), for which we are the proponent.

There are four main Stages to the Cabramatta Loop Project:

STAGE 1
SCOPING

This stage includes scoping of the Project and undertaking a preliminary environmental assessment to inform the Secretary's Environmental Assessment Requirements.

STAGE 2A
DEVELOPMENT

Reference Design and Environmental Assessment to inform the development of an EIS. This will be a vital stage to gather and consider feedback from stakeholders and the community.

STAGE 2B
EXHIBITION OF THE EIS

Engagement activities will focus on explaining the EIS, specialist studies and information stakeholders about how they can make a formal submission to the Department of Planning and Environment.

STAGE 3
DELIVERY

Following receipt of Infrastructure Approval, this stage will include the development of detailed design and construction of the Project.

STAGE 4
OPERATION

This stage will cover the maintenance and operation of the Project as part of the Southern Sydney Freight Line.

We are here

COMMUNITY AND STAKEHOLDERS

The image below outlines Community and Stakeholder groups who may have interest in the project and are proposed to be consulted during the development of the Project and exhibition of the EIS.

HOW WE WILL ENGAGE WITH YOU

During this stage. engagement is important to ensure that the concerns and aspirations of the Community and Stakeholders are known to the project team in designing and assessing the environmental impacts of the Project. Tools to be adopted during this phase include:

INFORMING YOU

- Newspaper advertisements regarding the community information sessions and EIS exhibition
- Newsletters – emailed, printed and used as flyers, and loaded to webpage
- Project website page – updated regularly with new information
- Letters to directly affected residents and businesses, informing them of the community information sessions and EIS exhibition and providing contact details for this Project

SEEKING YOUR FEEDBACK

- Community drop-in sessions during development of the Project and during exhibition of the EIS
- Toll free project phone number
- Email address
- Feedback forms online and at Community sessions
- Translation services will be made available
- Meetings with key stakeholders
