

Clause 3.2(b) - Major Maintenance Reporting – 2013

The Access Holder Agreement clause 3.2 requires the following information to be provided by 1 July of each Contract Year on a reasonable endeavours basis, but in any event before 30 September of each Contract Year, in respect to the following Contract Year:

- annual maintenance assumptions;
- Maintenance Months (ie those months in which major network possessions are planned to occur);
- Maintenance Losses (ie the coal train path usage losses resulting from the major network possessions);
- any known Availability Exceptions.

ARTC's maintenance assumptions for 2013 are that there will be a series of major maintenance possessions on the network across all Pricing Zones, each of 3 to 5 continuous days in the months listed in the table below*.

The table below lists the nominated Maintenance Months and aggregate number of path usages lost in each pricing zone per month as a result of major network possessions relative to overall Network Path Capacity (NPC).

There are no known Availability Exceptions for the period covered in the table at this time.

Month	PZ 1	PZ 2	PZ 3
Mar-13	432	172	136
May-13	281	172	136
Aug-13	405	161	128
Nov-13	281	112	88

*Adjacent infrastructure owner Railcorp conduct possessions which affect load points south of Islington Junction. These possessions are not included.
