

UPDATED

Maintenance work

Australian Rail Track Corporation (ARTC) will be carrying out maintenance work to maintain a safe and reliable rail network. The maintenance work involves repair or replacement of track elements such as its rail and sleepers. This work is scheduled to take place in two stages:

- **Stage 1 - between 6:00am Tuesday 5 April and 9:00pm Thursday 7 April.**
- **Stage 2 – between 6:00am Tuesday 24 May and 6:00am Friday 27 May.**

We will be working continuously between these times, **including nights**.

From early March, we will start mobilising to site and carrying out minor preparation works. Site preparation works will continue between the two project stages, and site clean-up will continue for up to two weeks following the completion of Stage 2. These works will occur during standard construction hours 7am to 6pm Monday to Friday and Saturday 8am to 1pm.

How could this work affect you?

There are traffic, noise, temporary light and dust impacts associated with this work. We will implement reasonable and feasible measures to minimise these impacts.

Preparatory works for each closedown will involve truck delivery of materials. Trucks will enter the work site via **Station Ln** and depart via **Old North Rd**. Traffic control will be used where required to ensure safe traffic flow.

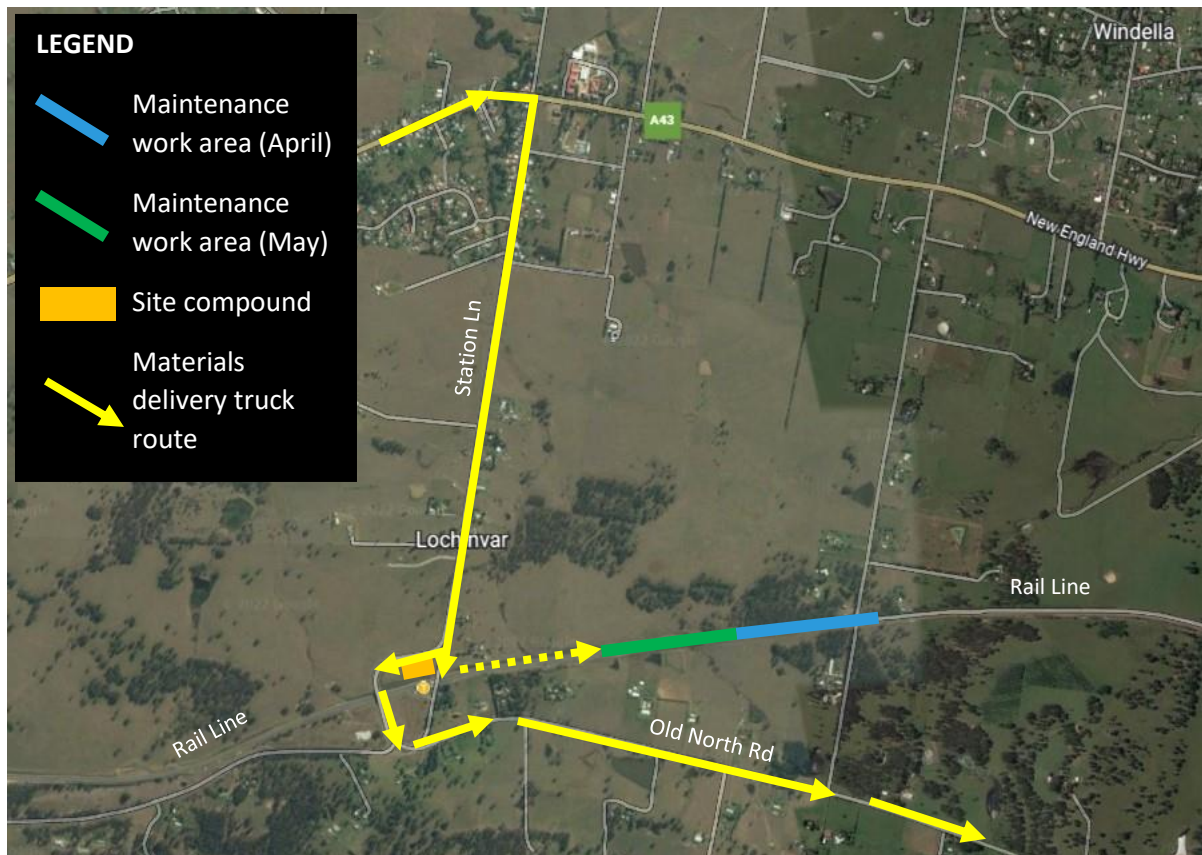

We will schedule noisy work for daytime hours where possible and turn off machinery when not in use to minimise noise.

Light towers will be required to ensure a safe work environment during the night. Light towers will be positioned to shine away from residences.

The movement of materials and machinery may result in the generation of dust. We will minimise the risk of dust by watering haul roads and work areas. On-site speed limit restrictions will also be implemented. During wet weather, measures will also be implemented to prevent the tracking of mud onto public roads.

Please note, the information provided is correct at the time of publishing but is subject to change due to unplanned or unexpected events such as operational changes or heavy rain.

Our response to COVID-19

For the latest information on our planned work please scan the QR code with your smartphone or QR code reader and scroll down to Track Work.

Rail is an essential service which facilitates the movement of freight across the country for the benefit of the Australian economy and jobs. This is a responsibility ARTC takes very seriously, and we are working hard to ensure we balance the challenge of ensuring the safety and reliability of a critical transport network, alongside our obligations to meet and respond to the current public health challenges associated with Covid-19. We are committed to adhering to the NSW Government guidelines and where practicable will implement additional control measures.

WANT TO KNOW MORE?

ARTC is committed to working with landowners, communities, state and local government agencies as a vital part of our planning and consultation work, and we value your input. If you have any questions or comments, please let us know.
