

KILLAWARRA TRACK MAINTENANCE OCTOBER 2021

Commencing 7:00am Saturday, 30 October

Maintenance works

Australian Rail Track Corporation (ARTC) will be carrying out track maintenance this October to maintain a safe and reliable rail network.

Track Reconditioning

The work being completed is known as track reconditioning which involves replacing rails, sleepers, ballast and formation. This work is scheduled between the hours of **7:00am and 5:00pm on Saturday 30 and Sunday 31 October** with no night work scheduled.

How could this work affect you?

The work will involve the use of machinery which will generate some noise. We will turn off machinery when not in use, arrange work in stages and/or phase the equipment used at one time to reduce noise impacts where possible.

The movement of materials and machinery on site may result in the generation of dust. We will take practical measures to reduce the amount of dust produced by our works. We recommend keeping windows and doors closed during the work. Please be aware that unforeseen high wind gusts may impede our ability to reduce overall dust levels.

Please also be mindful of the increase in heavy vehicle traffic associated with these works.

ARTC will be working hard to minimise any disruptions this work may cause and appreciates your patience and understanding while this important work is completed.

WANT TO KNOW MORE?

ARTC is committed to working with landowners, communities, state and local government agencies as a vital part of our planning and consultation work, and we value your input. If you have any questions or comments, please let us know.
