

# GOONDAH AND YASS JUNCTION BALLAST CLEANING WORK NOVEMBER 2021

Commencing 6:00am Saturday, 27 November

## Ballast cleaning work

Australian Rail Track Corporation (ARTC) will be carrying out scheduled ballast cleaning work in **Goondah on Saturday 27 and Sunday 28 November between the hours of 6:00am and 7:00pm daily.**

We will also be **loading a train with ballast in Yass Junction**, which will occur on **Saturday** afternoon sometime **prior to 7:00pm.**

It should be noted that this work is in addition to the rerailling work commencing Monday 29 November.

## How could this work affect you?

It will be noisy at times, and some dust may be generated. Please be assured that we will implement measures to manage and minimise these impacts on the community where possible.

The work will involve the use of machinery, vehicles and plant which will generate some noise. We will turn off machinery when not in use, arrange work in stages and/or phase the equipment used at one time to reduce noise impacts where possible. Loading the ballast train will also generate noise when the ballast drops into the wagons.

The movement of materials and machinery on site may result in the generation of dust. We will take practical measures to reduce the amount of dust produced by our works where possible, however we recommend keeping windows and doors closed during the work. Please be aware that unforeseen high wind gusts may impede our ability to reduce overall dust levels.

We thank you for your patience and understanding while these works are being undertaken.

For information on our planned works please scan the below QR code with your smartphone or QR code reader.

### WANT TO KNOW MORE?

ARTC is committed to working with landowners, communities, state and local government agencies as a vital part of our planning and consultation work, and we value your input. If you have any questions or comments, please let us know.
