

Starting Tuesday, 5 April

Rail Grinding Works

Australian Rail Track Corporation (ARTC) continually operates track machines across the network to improve track conditions and allow safer, more reliable, and quieter rail operations.

We will be completing **around the clock** rail grinding work **from Moss Vale to Dombarton from 7:00am Tuesday 5 April through until 8:00am Monday 11 April 2022.**

This work will be completed in periods when fewer trains operate allowing the work to be undertaken safely and efficiently, meaning that there will be some **late-night and overnight work.**

The rail grinding machine will be stabled for essential maintenance **overnight at Robertson on Saturday 9 April and Moss Vale overnight on Tuesday 5 April and Sunday 10 April 2022.** While this maintenance is being completed **the engine will continue running** to power the required equipment.

How could this work affect you?

These works are likely to be noisy as the rail grinding machine will remain idling during maintenance. This allows us to check that all the components of the machine are operating correctly. To mitigate noise, we will stable at a location away from homes and buildings where possible.

We will be working hard to minimise any disruptions this work may cause, and we appreciate your patience and understanding while this important work is completed.

For the latest information on our planned work please scan the QR code with your device.

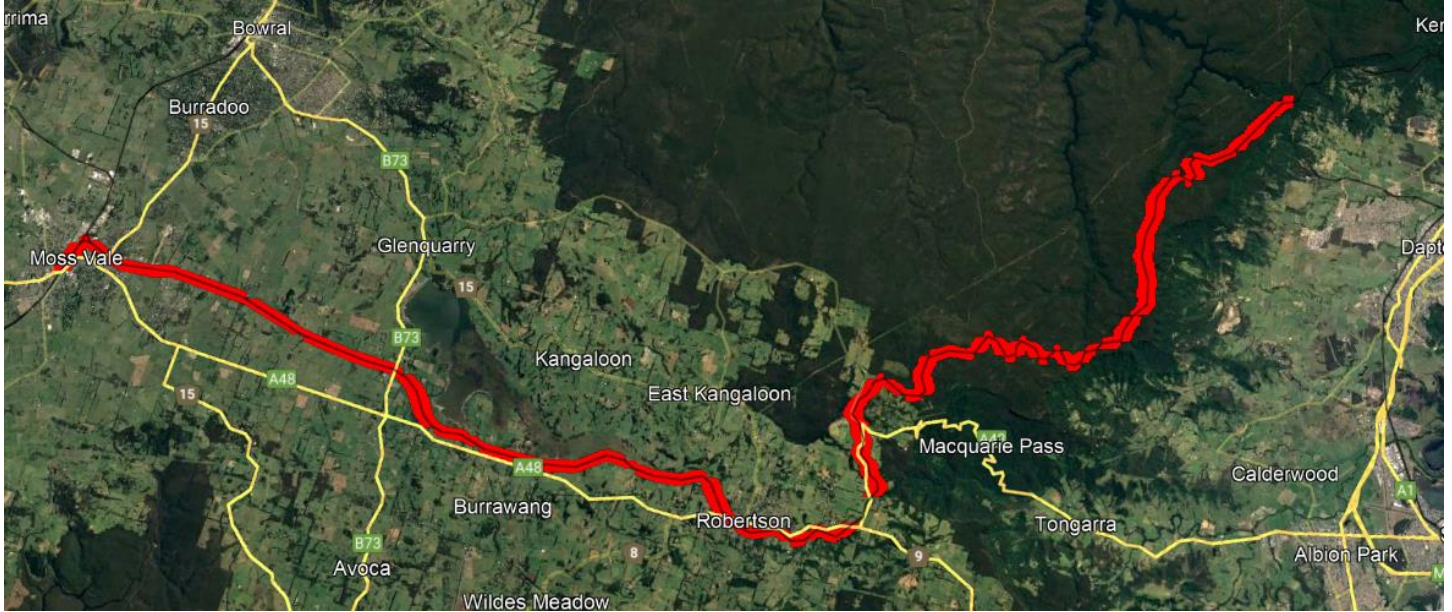

WANT TO KNOW MORE?

ARTC is committed to working with landowners, communities, state and local government agencies as a vital part of our planning and consultation work, and we value your input. If you have any questions or comments, please let us know.

Location of work:

Our response to COVID-19

Rail is an essential service which facilitates the movement of freight across the country for the benefit of the Australian economy and jobs. This is a responsibility ARTC takes very seriously, and we are working hard to ensure we balance the challenge of ensuring the safety and reliability of a critical transport network, alongside our obligations to meet and respond to the current public health challenges associated with Covid-19. We are committed to adhering to the NSW Government guidelines and where practicable will implement additional control measures.
