

# MINDARIBBA TO KUNDABUNG TRACK MAINTENANCE

Commencing Wednesday, 20 April

## Track maintenance work

Australian Rail Track Corporation (ARTC) will be carrying out scheduled track maintenance work at various locations on the north coast line between **Mindaribba and Kundabung**.

Work is scheduled **around the clock** from **Wednesday 20 April** through until **Tuesday 26 April 2022 including weekend work**.

## How could this work affect you?

It will be noisy at times, and some dust may be generated. Please be assured that we will implement measures to manage and minimise these impacts on the community where possible.

The work will involve the use of mobile on track tamping machinery which will generate some noise. However, the machine will be travelling between 10km and 40km each shift so it will not remain in any one place for an extended period.

The movement of materials and machinery on site may result in the generation of dust. We will take practical measures to reduce the amount of dust produced by our works where possible. Please be aware that unforeseen high wind gusts may impede our ability to reduce overall dust levels.

Traffic controllers and temporary signage will safely guide all road users around any changed traffic conditions. Please keep to the speed limits and follow the direction of the traffic controllers and signs.

We thank you for your patience and understanding while these essential works are being undertaken.

For information on our planned works please scan the below QR code with your device.

### WANT TO KNOW MORE?

ARTC is committed to working with landowners, communities, state and local government agencies as a vital part of our planning and consultation work, and we value your input. If you have any questions or comments, please let us know.
