

ARTC Approved Technical Training Providers

A Rail Industry Worker must be able to produce a unit of competency in accordance with the ARTC rail safety worker competency matrices.

The unit of competency must be issued by an approved Registered Training Organisation with the unit of competency on their scope of registration.

To enable ARTC to manage risk and having regard to the safety critical nature of work on track, ARTC will only accept safeworking qualifications and training from approved training providers.

Currently the following providers have been approved to deliver ARTC Safeworking Training Material. Not all providers are able to provide training in every role across the ARTC Network. For specific information, please contact your chosen provider on this list to see what they are approved to deliver

RTO Name	Email Address	Telephone Number
Aakira / Training Ahead	bookings@trainingahead.com.au	1300 355 900
