

RAIL WORK NEAR YOU

We're doing essential rail work in your area soon.

Dear Neighbour,

The Australian Rail Track Corporation (ARTC) will soon be undertaking site investigations on the freight rail line near your property. The works involve use of heavy machinery to safely and efficiently locate utilities under the rail line and conduct soil testing. The works will primarily occur in the rail corridor near Robey and O'Riordan Street, see overleaf for site location.

We have limited opportunities throughout the year to access this area for work due to the number of freight services that use this rail line. Because of this, we will be working around the clock to best use this rail possession. You may experience low to moderate noise at times during the works including outside of normal work hours, however controls will be in place to manage potential noise impact.

Thank you for your patience while this important work is undertaken. For environmental issues, please contact Enviroline on 1300 550 402 or Enviroline@artc.com.au For information about the Botany Rail Duplication, visit artc.com.au/projects/botany-rail-duplication-project/

WHERE

Botany Line - Rail corridor
King Street to O'Riordan
Street, Mascot

WHEN

From:

2am 26th December 2019

To:

10pm 26th December 2019

The logo for the Australian Rail Track Corporation (ARTC) features the letters 'ARTC' in a bold, sans-serif font. A horizontal bar is positioned above the 'T', and another horizontal bar is positioned below the 'A'.
