Location: ARTC Network Wide

Subject Title: Double Stacking of Half Height Containers to Permissible Rolling Stock Outlines

Operator(s): All Operators

Effective From: 28/05/2024

Effective To: Until Published

**Reference Documents:**

Route Access Standard: General Information and RAS Appendix A - Rolling Stock Outlines and Loading Requirements

**General Details / Operating Condition:**

ARTC has become aware that half height containers have been loaded in a double stacking arrangement and operated in corridors where single stack rolling stock outlines are applied.

This RACN provides a clarification of double stacked container loading configurations and to which Rolling Stock Outlines and Loading Profiles this configuration is permissible on the ARTC Network.

Double Stacking of containers is only permissible within the following rolling stock plates areas of application:

- F1,
- F2
- E1

Refer areas of operation as tabled within Route Access Standard – General Information – Section 5 & RAS Appendix A - Rolling Stock Outlines and Loading Requirements.
